

Company Profile.

BluScape offers a comprehensive range of services designed to transform your outdoor space into a beautiful, functional environment.

We bring projects of varying sizes to life, adopting a partnership approach with our clients throughout the project lifecycle.

BluScape Commercial Landscaping was founded on the realisation that there was a gap in the market; for clients to engage one contractor to complete all aspects of the construction process.

We've entered the market resourced with experienced personnel and fleet of company-owned plant to complete a broad range of projects.

With a company philosophy founded on partnering and team work, we employ and engage with like-minded people to deliver high quality outcomes for our clients, without compromising the design intent.

Built off the back of parent company BluBuilt's values, we strive to innovate in response to technical challenges, while implementing sustainable solutions.

Our in-house resources, coupled with a strong network of local subcontractors and suppliers, allows us to deliver:

- Landscape construction across a range of sectors
 - Bespoke services required by local councils and state government authorities
 - Urban and community space projects.
-

Our Green Construction Philosophy

Australia is one of the world leaders when it comes to developing green projects and although this has been a highlighted focus for the building and commercial sectors, we believe it is a mindset that needs to be adopted and implemented at ground level.

With a collaborative approach from initial design through to project delivery, our field activities and daily operations are reviewed and managed to reduce the adverse impacts the construction industry can cause to the local environment.

Using these ideals, we strive to promote sustainability through greenhouse gas and carbon emission reduction, effective waste management strategies, and a stronger approach to a circular economy.

With the construction industry being one of the biggest contributors to the economy, it is our responsibility to incorporate an

eco-conscious mindset to deliver 'positive impact' projects while reducing the environmental impact.

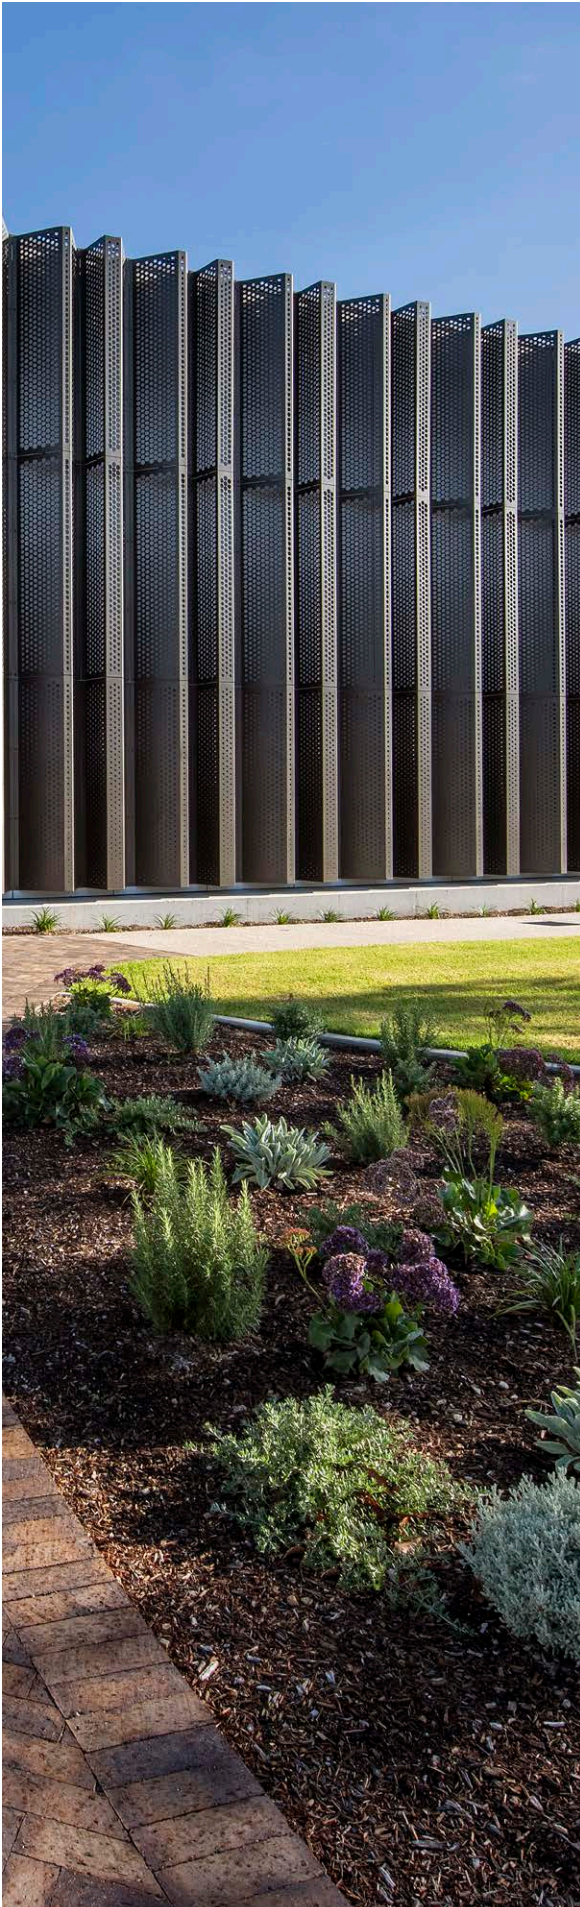

It is through these values and practices that BluScape endeavours to provide quality commercial landscaping with the vision of building landscapes for future generations to enjoy.

This, combined with our exceptional track record of safely delivering projects on time and budget, is how we guarantee premium quality construction projects that exceed client expectations.

Our in-house delivery capabilities, coupled with a robust local network of subcontractors and suppliers, enable us to provide innovative solutions to complex challenges at any point in the project lifecycle.

Eco-Conscious Construction
Methods for Positive Impact
Projects

CREATING LANDSCAPES THAT BENEFIT THE LOCAL FLORA & FAUNA AND ESTABLISHING ENVIRONMENTS THAT ENHANCE THE OF THE SURROUNDINGS

PROTECTION AND PRESERVATION OF LOCAL ENVIRONMENTS TO SAFEGUARD NATURAL HABITATS, AND MITIGATE THE ADVERSE EFFECTS OF HUMAN ACTIVITIES

PLANTING NATIVE TREES AND CONTRIBUTING TO CARBON OFFSET INITIATIVES, ACTIVELY SUPPORTING NATURAL ECOSYSTEMS RESTORATION AND FOSTERING A GREENER ENVIRONMENT

USING SUSTAINABLE AND RECYCLED MATERIALS TO CONTRIBUTE TO THE CIRCULAR ECONOMY, MINIMISING WASTE AND PROMOTING A MORE SUSTAINABLE APPROACH

INCORPORATING WATER SENSITIVE PRACTICES AND CONSERVATION TECHNIQUES

IMPLEMENTING WASTE MANAGEMENT SYSTEMS THAT REDUCE GREENHOUSE GAS EMISSIONS TO COMBAT CLIMATE CHANGE AND MINIMISE LANDFILL CONTRIBUTIONS

ENCOURAGING THE ADOPTION OF INNOVATIVE RECYCLING

OPERATING PROGRESSIVE PLANT AND EQUIPMENT AND MONITORING FUEL CONSUMPTION

WORKING WITH LOCAL SUPPLIERS AND CONTRACTORS WHO SHARE OUR ENVIRONMENTAL POINT OF VIEW

RESEARCHING AND ADOPTING ALTERNATIVE CONSTRUCTION METHODS TO REDUCE OUR CARBON FOOTPRINT AND EMBRACE SUSTAINABLE PRACTICES

PROMOTING A MORE ENVIRONMENTALLY RESPONSIBLE APPROACH TO BUILDING

Landscape Construction.

We offer an extensive range of soft and hard landscaping services to a wide range of clients.

Our proficient and knowledgeable team adopts a collaborative approach with our clients. This allows us to deliver exceptional outcomes, crafting 'positive impact' projects that deliver for years to come.

OUR CAPABILITIES

- Hard and soft landscaping
- Soil conditioning and cultivation
- Turf preparation and installation
- Reticulation and irrigation systems
- Advanced tree planting
- Planting and revegetation
- Paving and stone masonry
- Retaining walls and feature walling
- Concrete surfacing
- Sporting ovals and courts
- Play space construction
- Bespoke and inclusive play elements
- Street furniture and bollards
- Electrical and lighting
- Boardwalks, decks, shelters and shade structures
- Exposed aggregate and architectural concrete.

Civil & Infrastructure.

We have extensive experience in civil and infrastructure construction, which provides a true capability as a 'one stop shop' in the delivery of high quality civil infrastructure and complex landscape construction.

Our team provides comprehensive civil construction through our extensive fleet of plant and equipment, enabling us to undertake a wide range of tasks.

OUR CAPABILITIES

- Bulk earthworks, site clearing, trenching, shaping batters and swales
- Carpark and road construction, base preparation, kerbing and asphalt
- Stormwater design, installation of pits, pipes, and culverts
- Underground services including electrical, water, sewer and NBN
- Detailed excavation, particularly in urban projects for working around pits and services
- Retaining walls and soil stabilisation.

Design & Construction

Partnering with BluBuilt, we've formed a design and construct team dedicated to delivering the best outcomes for our clients. With our landscaping expertise, we can work collaboratively with our clients to develop comprehensive design solutions and efficiently execute them from inception to completion. Supported by BluBuilt's depth of design and construction experience, we are uniquely positioned to provide a seamless and comprehensive service.

Our construction knowledge allows us to develop designs with sound construction practices in mind. This, in combination with our ecological compassion and horticultural knowledge, this allows us to provide, tailored environmentally conscious design options that focus on sustainability.

Our clients have continued access to our design and construct team through the project lifecycle to ensure collaboration and keep our clients updated on project progress. Our team adheres to a design ethos that prioritises functionality, inclusivity, sustainability, and pragmatic design solutions, while our construction management and operations team ensures constructability and quality finish are achieved.

This team has built strong relationships with our internal construction teams; a synergy that results in quality driven outcomes, clearly communicated design intent, and efficient decision making onsite.

MCGILP RESERVE UPGRADE

EDWARDSTOWN SAAS AMBULANCE STATION

ST JOHN BOSCO COURTYARD

We partner with like-minded individuals to deliver high quality outcomes, without compromising design.

Beach Road Streetscape.

City of Onkaparinga, Construct Only, \$0.5M

This project comprised construction of four landscape nodes along Beach Road, Christies Beach including demolition works, stormwater infrastructure, electrical and lighting, new kerbing and road reinstatement, footpath extensions, new paved areas, new concrete plinths and seating, new garden beds and street trees, irrigation works, and infrastructure services connections.

The works were delivered in a confined footprint, on a busy urban street, which was challenging. Works were scheduled outside of business hours to minimise the impact on local shops.

Edwardstown Ambulance Station.

BluBuilt and the Department for Infrastructure and Transport, Construct Only, \$0.15M

Landscaping of the new ambulance station including irrigation system design and construct, earthworks, soil amelioration and topsoiling, composite edging, advanced tree planting, turf installation, and planting and soft landscaping. The rear carpark of the new building was not trafficable, we adopted alternative landscape methods to access the rear garden to complete the works.

By adopting our waste management practices and sustainability targets, this project saved 1m³ of recyclable materials from landfill and implemented the sustainable use of recycled plastic composite edging.

Kingston Park Kiosk.

BluBuilt and the City of Holdfast Bay, Construct Only, \$0.05M

The architecturally designed kiosk boasts seating for up to 40 guests indoors and 42 outdoors. Constructed on a culturally significant Kaurna site, we provided a revised landscape design to ensure the area was protected. We undertook demolition and earthworks, irrigation design and construction, soil amelioration and topsoiling, composite edging, corten steel laser cut screen, advanced tree planting, turf installation, planting and softscaping, and external pavements.

Robust traffic management strategies were required to work within the confines of an operational holiday park and highly trafficked shared use path.

Woodlake Reserve.

City of Charles Sturt, Construct Only, \$0.3M

Local playground and reserve upgrade to include nature play, playground and softfall installation, advanced tree planting, irrigation system, shelters, soft landscaping and planting, pavements and fencing, and lawn reinstatement. As there were a number of tree protection zones, we redesigned the new concrete footpath to weave around the shallow roots, while maintaining compliance with DDA regulations.

By adopting our waste management practices and sustainability targets, this project saved 3m³ of recyclable materials from landfill, used 156t of salvaged materials and implemented the sustainable use of recycled polymer reinforced concrete and salvaged timber seating logs..

Knox Sports Park Reserve.

BluBuilt and the City of Onkaparinga, Construct Only, \$2.5M

The sports park was designed to provide modern amenities to the southern athletic community. Works included a 1.8ha irrigated oval with megaflow drainage, senior sized soccer field, discus and throwing circles, two-way long jump/triple jump, 400m athletics track, 200m² storage facility with power, public toilet, 22,000L storage tank and pumping system, inclusive playground, and tree planting & landscaping.

By adopting our waste management practices and sustainability targets, this project saved 1,500m³ organic materials from landfill, used 500t of salvaged topsoil, and implemented the sustainable use of recycled plastic composite edging.

McGilp Reserve Upgrade.

BluBuilt and the City of Playford, Construct Only, \$0.7M

We were engaged at the greater McGilp Reserve Upgrade project to undertake the irrigation to oval and entry statement, soil amelioration, mega flow drainage system, soccer pitch extension, including placement of growing medium and laying instant turf, new play space with multiplay tower and inclusive carousel, rubber surfacing and organic softfall, rock boulder edging and timber log, advanced tree planting, and mulched garden beds and planting.

During the project, we returned 1,733 plant pots to the nursery for reuse, used recycled HDPE materials in the new drainage system, and 126t of recycled materials were used.

St John Bosco Courtyard.

Catholic Church Endowment Society, Construct Only, \$0.7M

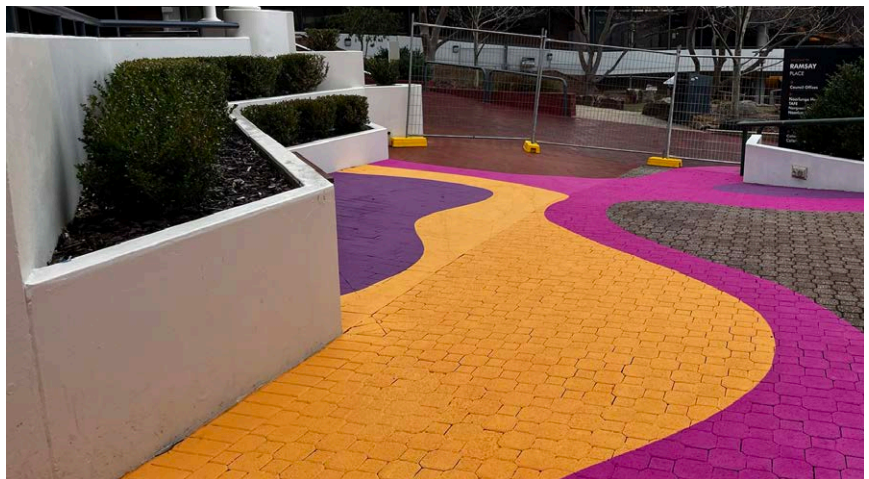

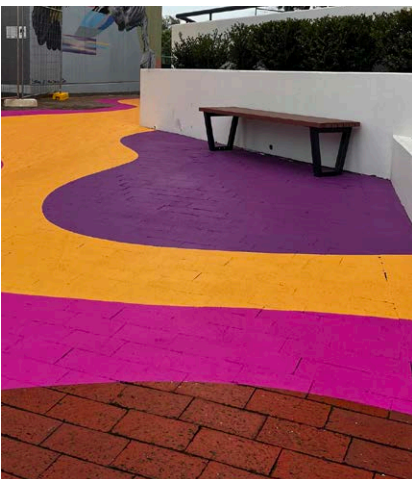

This project, undertaken in an operational primary school, comprised an upgrade of the central courtyard including demolition of the existing courts and pavements, new concrete and paved footpaths, construction of an amphitheatre and arbor, installation of furniture and shade sails,ature play and creek water feature, irrigation system, and garden beds.

This once tired courtyard has been revitalised and transformed into a multi-functional spcae designed to inspire learning and foster community engagement.

Ramsey Place Gateway 1.

City of Onkaparinga, Construct Only, \$0.2M

The project comprised construction of entrance improvements to Gateway 1, Ramsay Place. Gateway 1 is an important public pedestrian entrance providing public access to a regional civic centre, Hopgood Theatre, and Colonnades Shopping Centre.

We were engaged to transform the space into a welcoming and aesthetically pleasing entrance, while providing a safer environment and better wayfinding. The works included demolition of signage and fencing, landscape walling and edging, landscaping, fencing and barriers, installation of furniture and fixtures, and texture coating graphic to existing pavement.
